

ILRS TECHNICAL WORKSHOP 2019

Stuttgart 21st - 25th October

Workshop Resolutions

Session 6

2019 ILRS Technical Workshop

October 25, 2019

Workshop resolution

Recognizing the importance of the BLITS-M satellite in the development of new retroreflector technology, and its anticipated contribution to space geodesy and other ILRS activities,

The participants of the 2019 ILRS Technical Workshop strongly endorse ILRS support of the BLITS-M mission.

Workshop resolution

Recognizing the importance of removing systematic errors from SLR measurements and recognizing the potential of optical time transfer as a rigorous tool to achieve this,

The participants of the 2019 ILRS Technical Workshop strongly encourage the ILRS to further and improve this capability.

Workshop resolution

- Recognizing the great success of the 2019 ILRS Technical Workshop, the Workshop participants express their sincere appreciation to:
 - DLR for organizing and hosting the Workshop,
 - Sponsors for their support of the Workshop, and
 - Daniel Hampf and all the members of the Local Organizing Committee for their meticulous efforts and exceptional organization that enabled such a successful workshop.
